

AD1 - ITS Data Mart California Transit Database

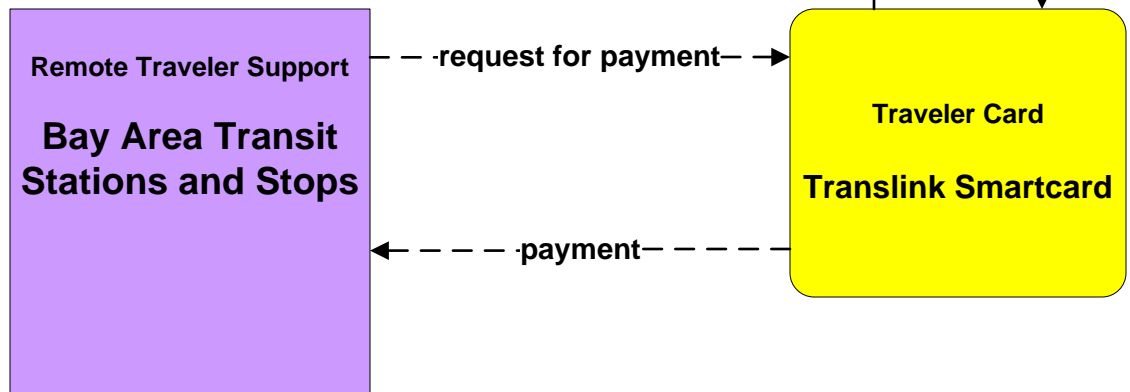

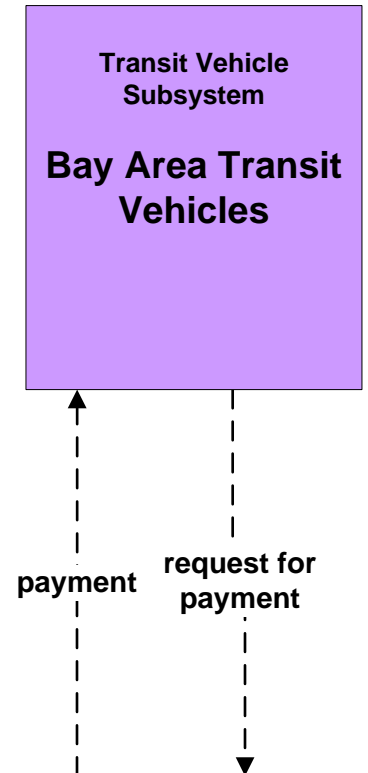

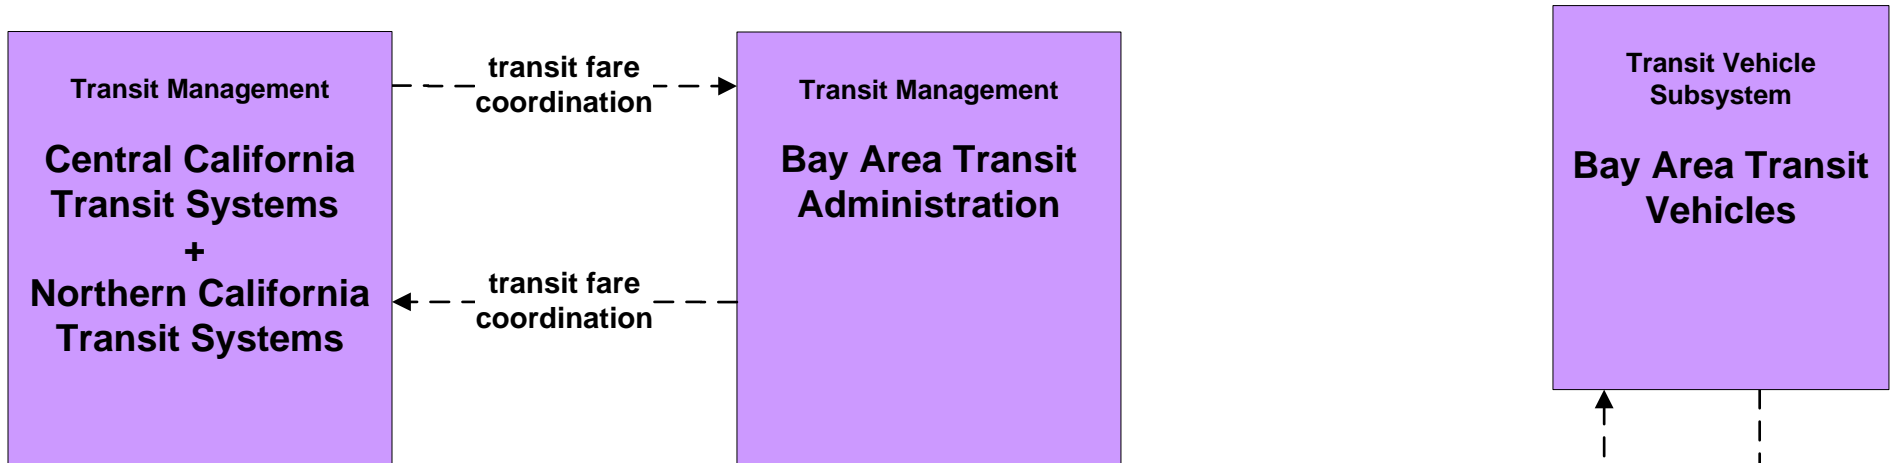

APTS4 - Transit Passenger and Fare Payment Northern California Transit Systems

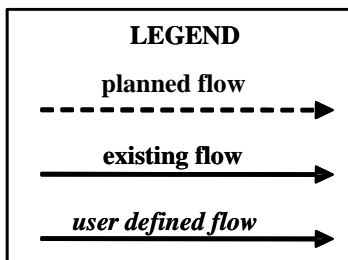

Translink is a near term regional fare card system. The purpose of this Market Package diagram is to suggest that within the timeframe of the architecture the system could be used outside the Bay Area in other transit systems- then requiring interregional coordination between transit agencies.

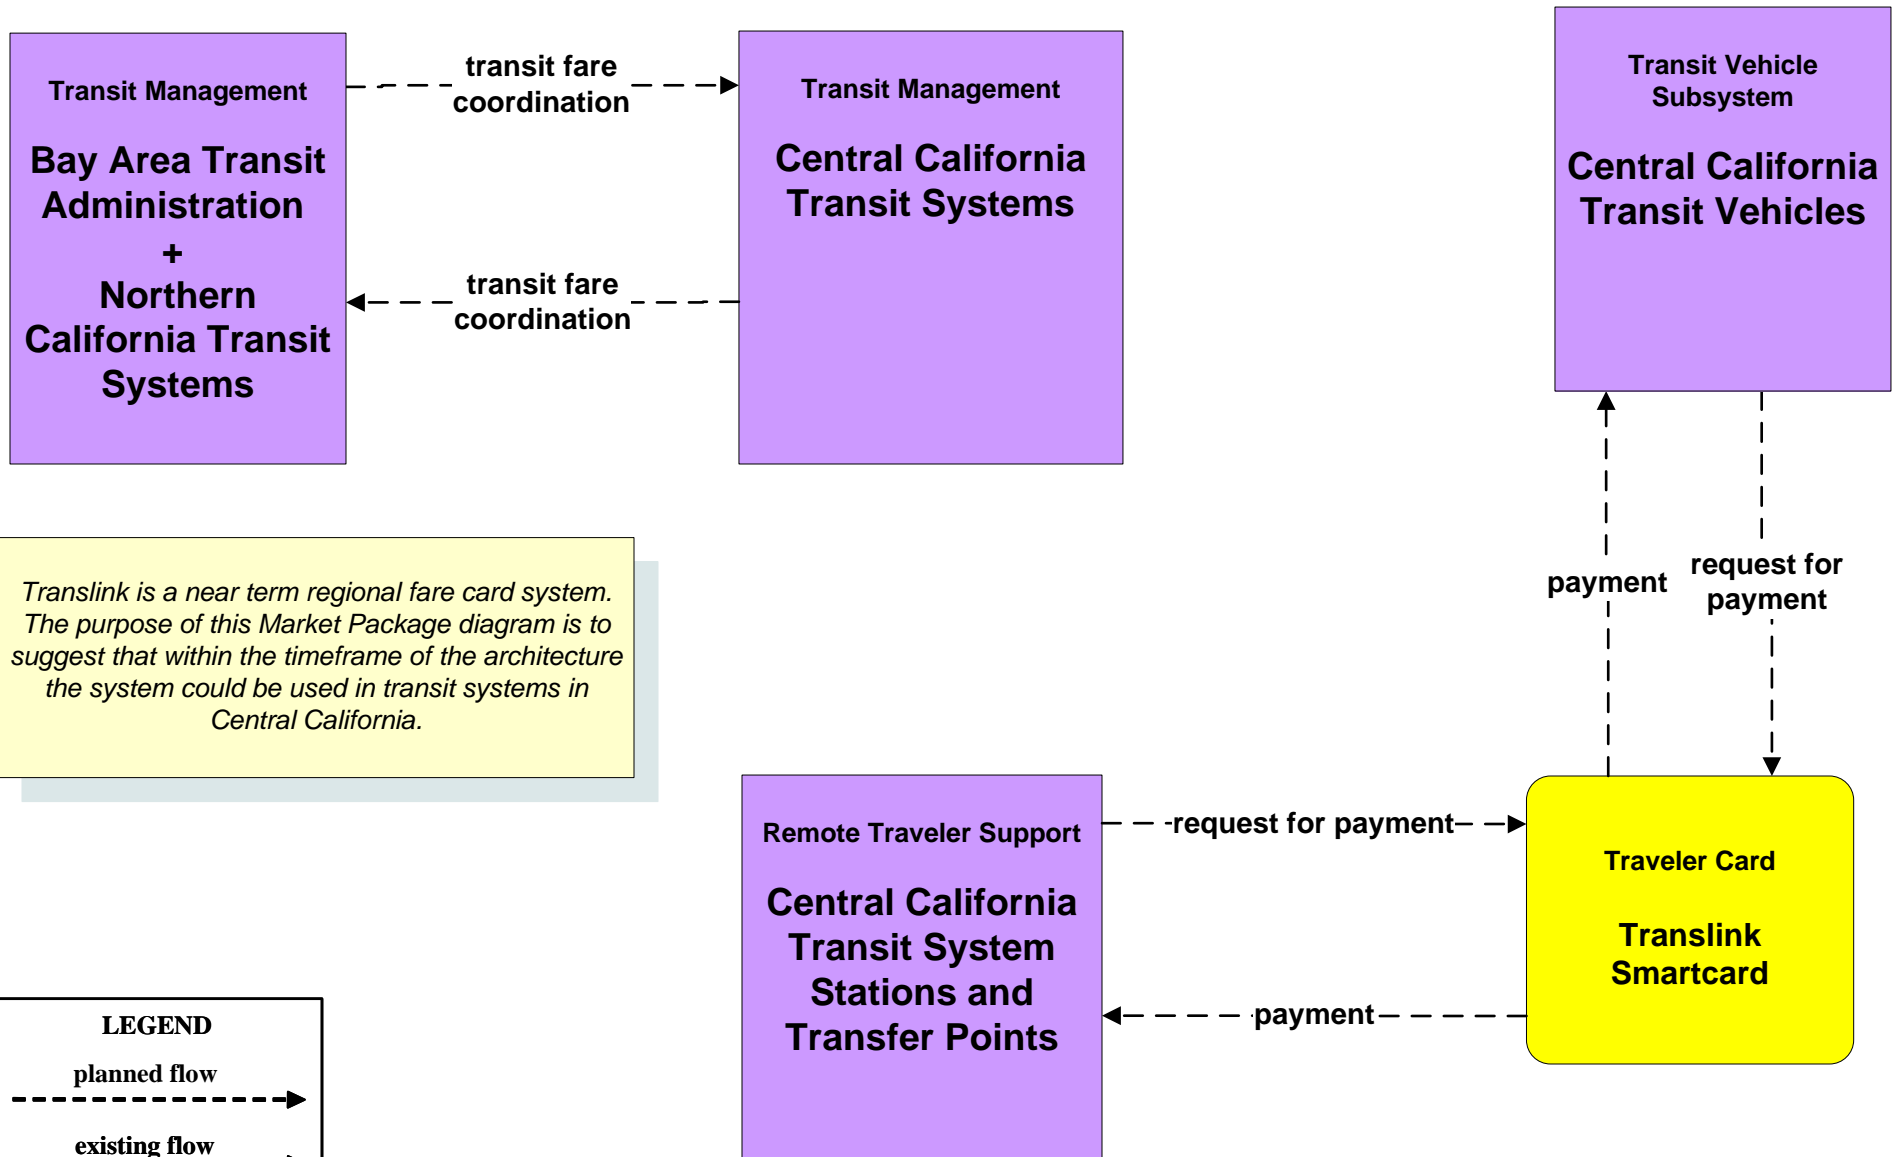

APTS4 - Transit Passenger and Fare Payment Bay Area Transit

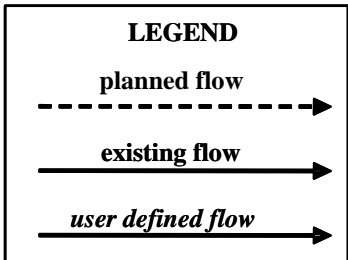

Translink is a near term regional fare card system. The purpose of this Market Package diagram is to suggest that within the timeframe of the architecture the system could be used outside the Bay Area in other transit systems- then requiring interregional coordination between transit agencies.

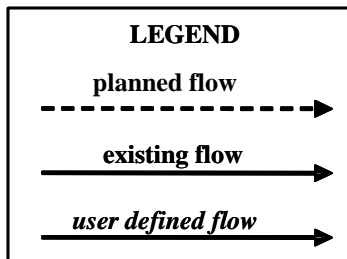

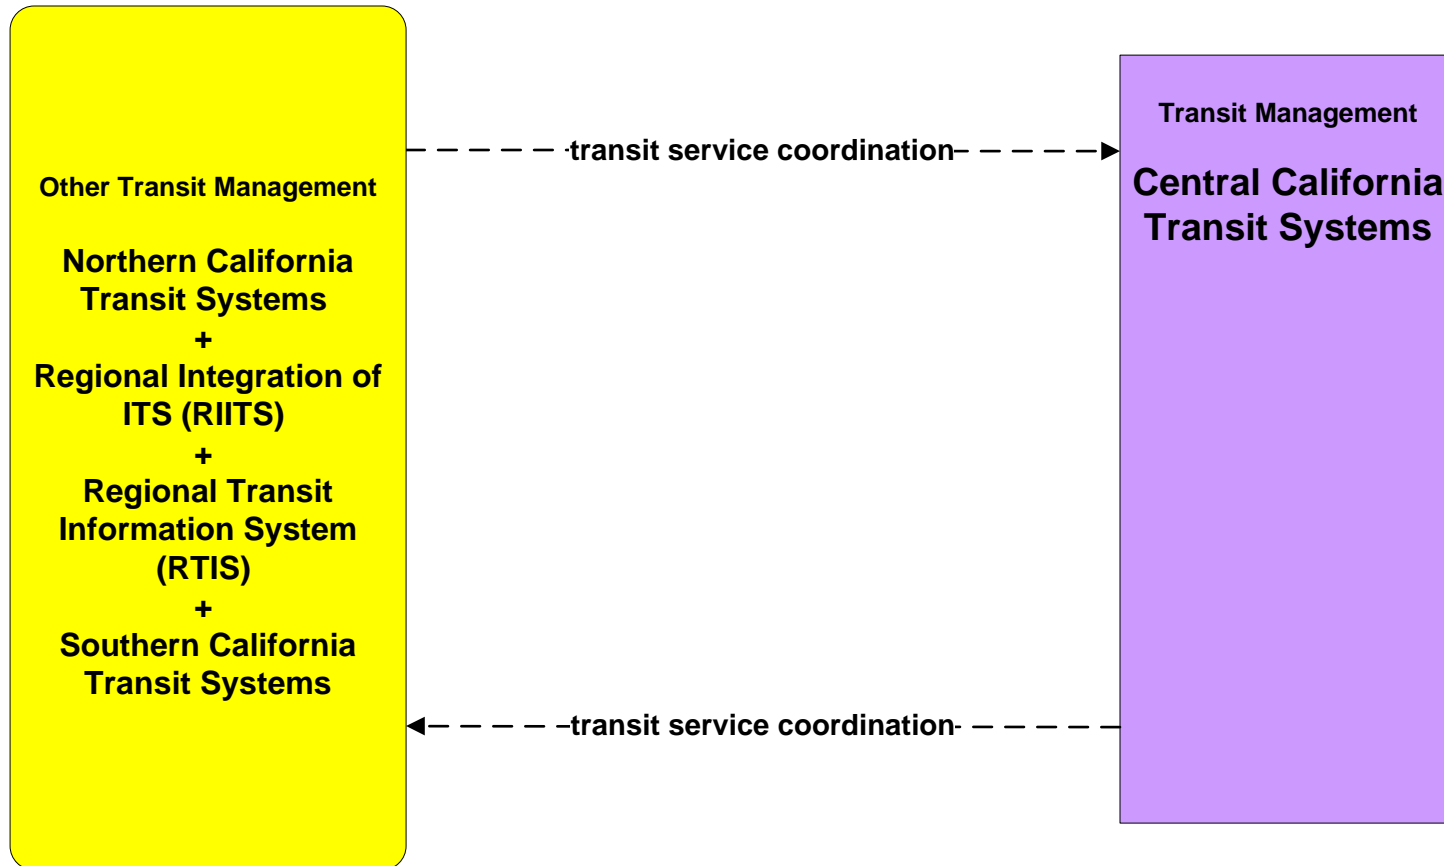

APTS4 - Transit Passenger and Fare Payment Central California Transit Systems

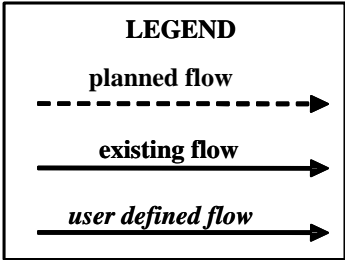

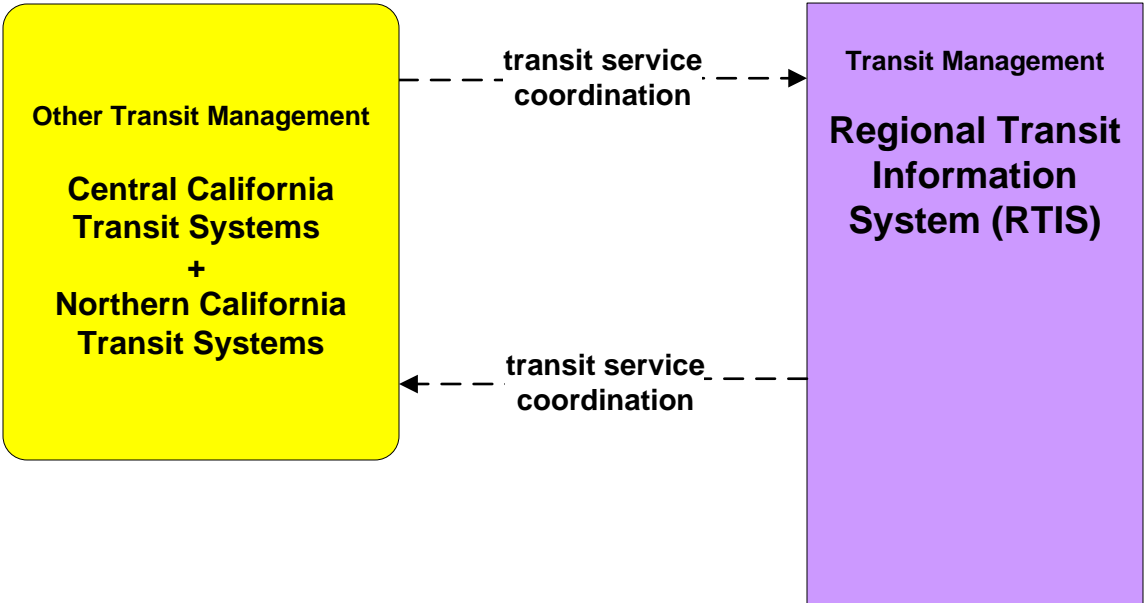

Translink is a near term regional fare card system. The purpose of this Market Package diagram is to suggest that within the timeframe of the architecture the system could be used in transit systems in Central California.

APTS7 - Multimodal Coordination Central California Transit Systems

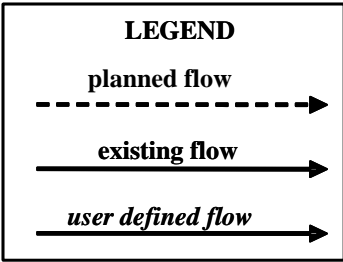

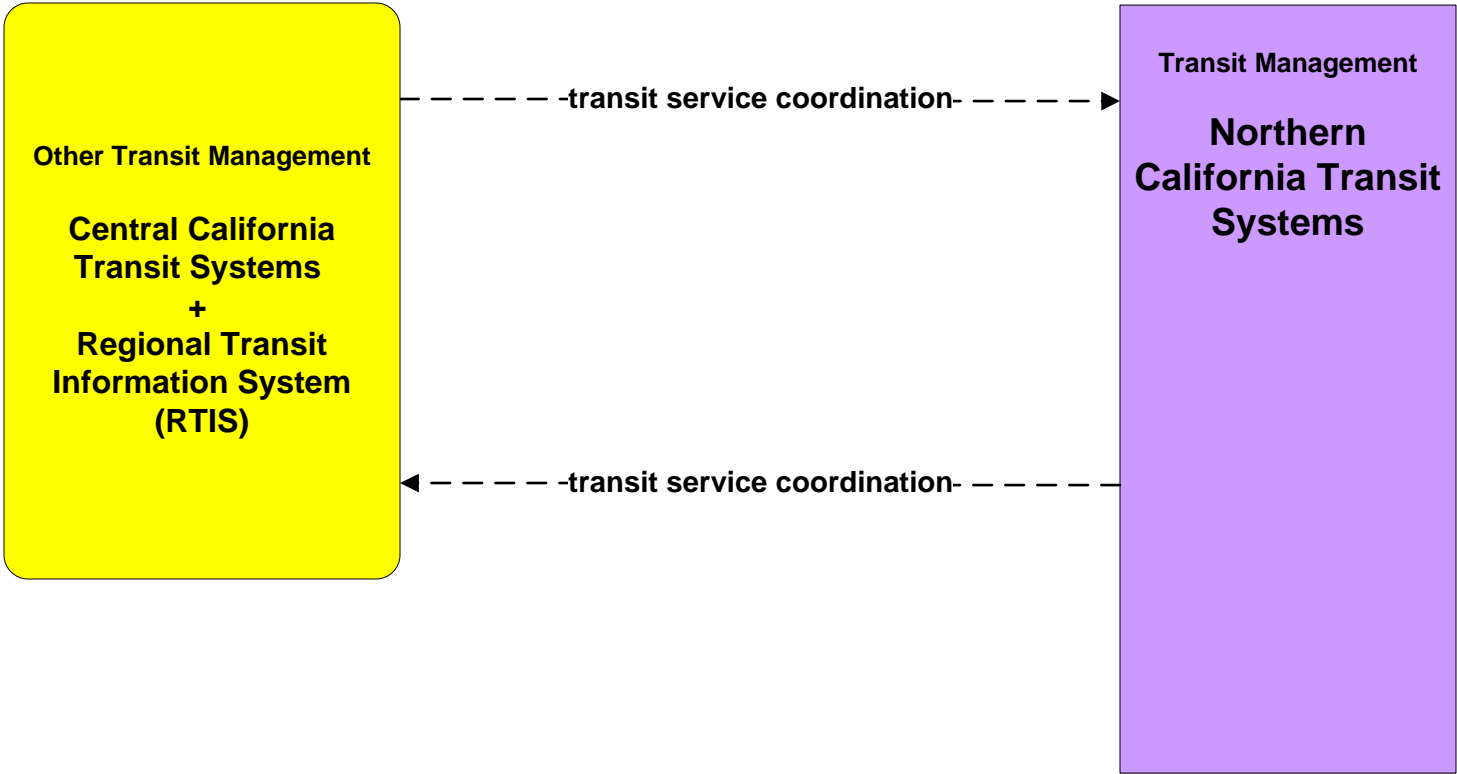

**APTS7 - Multimodal Coordination
RTIS**

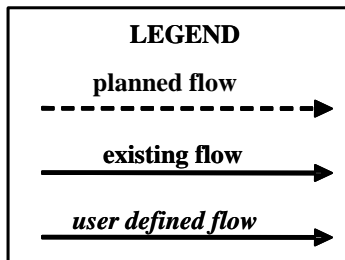

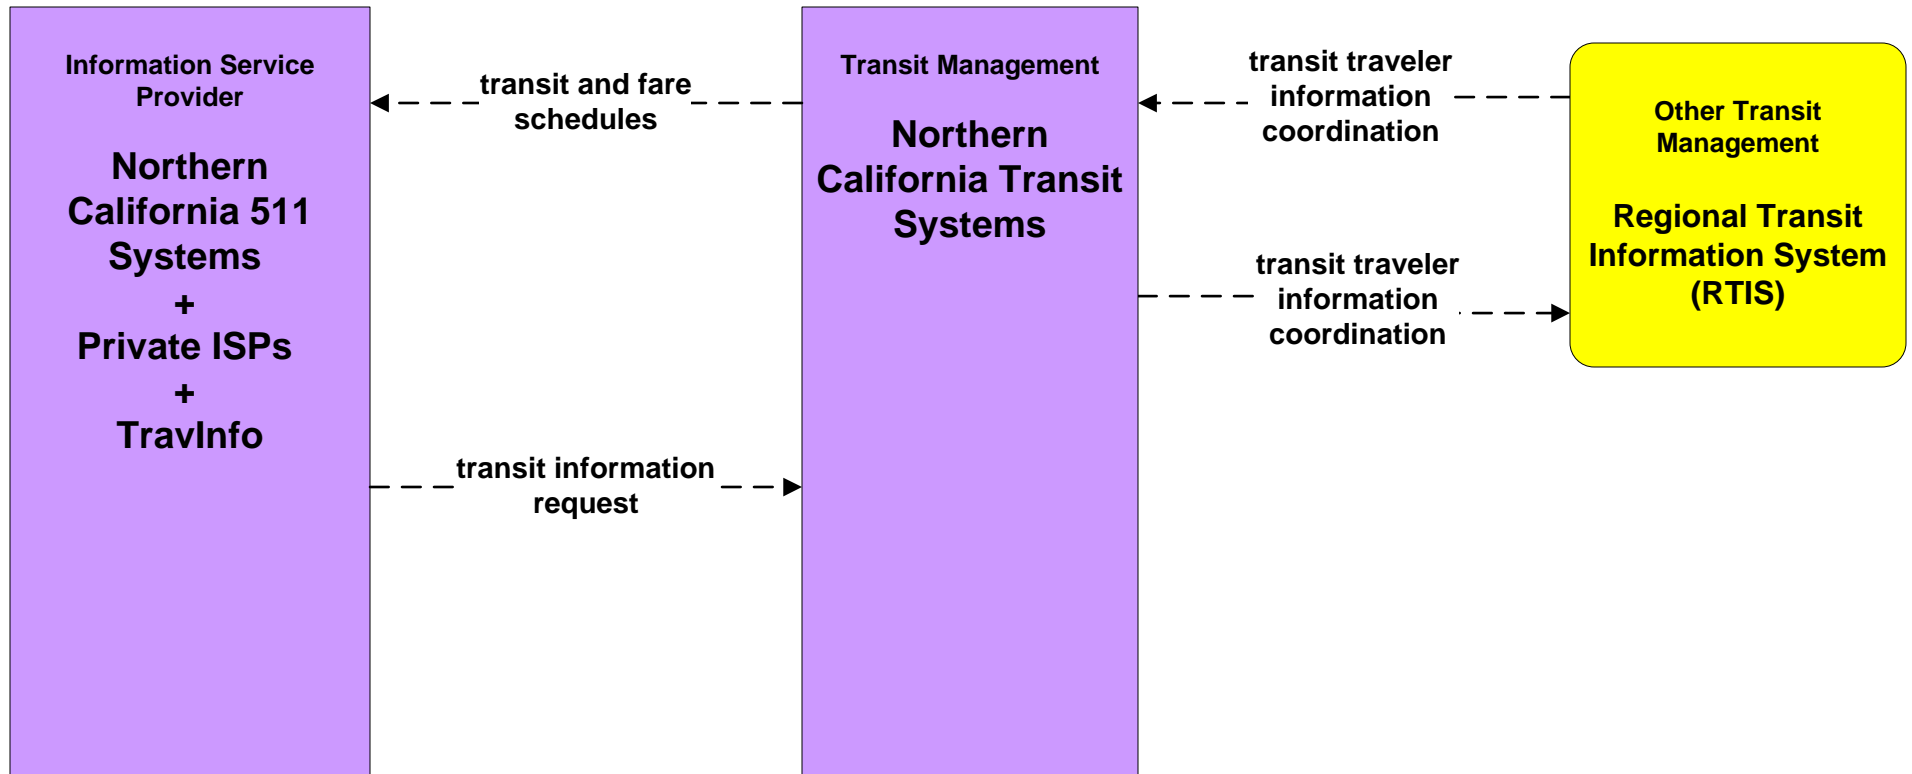

RTIS represents the information exchange mechanism for transit properties in the Bay Area. The interregional aspect of this system is the future possibility for transit agencies outside the area to access for exchange of service information.
